

CASE STUDY: NEWMONT

**SUCCESSFUL SAP
IMPLEMENTATION
& TRAINING**

OVERVIEW

With more than 90 years of history in the mining industry, Newmont is one of the world's largest gold producers. Through responsible mining, they believe they can create a stronger business and value for all their stakeholders. Newmont Mining is the only gold producer listed in the S&P 500 index.

Newmont Mining implemented SAP FICO to replace multiple legacy systems, which provided executives in Denver, CO with real-time visibility into the mining operations in South America. Training was also provided for the new system.

CHALLENGES

Merian, Newmont Mining's gold mine in Suriname, South America, had been reporting all financial data through multiple systems. Their deep-rooted process involved duplicate data entry into Excel and QuickBooks and did not provide real-time data to leadership. The biggest challenge was developing a training curriculum and delivering it in the right manner to engage the audience. Some users had been working with the old systems and processes for over 20 years, therefore it was essential to have them adopt the new system.

SOLUTION

Planet Technology deployed a team of training experts with complementary skills in the FICO sub-modules. The team created training plans and developed materials and curriculum, which was successfully delivered on site in Suriname. Implementing SAP FICO enabled Newmont Mining to improve their process and now provides their U.S. headquarters with access to real-time data.

SAP FICO FUNCTIONALITY

Newmont's Merian mine site in Suriname is now fully functional on SAP FICO

SAP SYSTEM USER ADOPTION

Users have embraced the usage of the SAP system to enter financial data

RESULTS

REAL-TIME DATA ACCESS

C-suite access to real-time data from the Suriname mine

REMOTE MONITORING

Executives can evaluate the success of their Suriname mining operations from Newmont's U.S. headquarters

Planet Technology, part of The Planet Group, is an award-winning Technology search and staffing firm. Our Enterprise Systems division delivers technology experts and project solutions in the SAP, Big Data, Advanced Analytics, and Cloud markets. We build genuine, long-term relationships with our customers and consultants that go beyond a simple transaction.
