WHO WE ARE

Planet Technology, part of The Planet Group, is an award-winning Technology search and staffing firm. We build genuine, long-term relationships with our customers and consultants that go beyond initial engagements. Many organizations aren't taking full advantage of the useful collaboration tools packed into Microsoft 365. Planet Technology has a team of practitioners experienced in planning, building and implementing Microsoft 365 and SharePoint solutions. We can create easy-to-maintain platforms customized to your team's needs using out-of-the-box tools, or build highly customized applications by extending the capabilities of the platform using low-code or full-code based solutions. We specialize in intranets, extranets, automated workflows, records management, collaborations and more.

PROJECTS

IMPLEMENTATION & CONSULTING

Planet Technology focuses on increasing business productivity via various Microsoft 365 applications. We can implement a custom plan from the ground up, or simply help roll out individual apps and collaboration tools. Our team specializes in intranet build outs, file share migrations, and IT governance and security strategies.

MAINTENANCE & SUPPORT

Planet Technology can assist your company with ongoing maintenance and support of Microsoft 365, SharePoint & Azure by providing technical expertise and assistance for your organization's IT staff. We can also directly aid your users to keep your IT staff focused on other projects.

OFFERINGS

MICROSOFT 365, SHAREPOINT & AZURE DEVELOPMENT

There are many ways to implement Microsoft 365 and SharePoint out-of-the-box, but not all of them are the right way. Improve your processes and increase ROI by employing the expertise of our team. We specialize in development with Power Platform, SharePoint Framework, and numerous Azure Services.

TRAINING FOR USERS, IT PROS & DEVELOPERS

Planet Technology offers Microsoft 365 training sessions customized for you. We build the training session based on information gathered from your team so they walk away with real world, hands-on knowledge of Microsoft 365 they can implement immediately.
